

13 February, 2018

Dear Mrs. Wang,

My name is Dong Liye, a graduate at Central University of Finance and Economics projected to graduate in 2019. After reviewing the job description for 2018 summer internship program, I believe that you are looking for a competitive aspirant with creativeness and inclusiveness, which makes me a perfect candidate for this work.

In the past few years, I pursued my studies in Jinan, Beijing, and have stayed in Singapore as a visiting scholar for half a year. 6-year studies in accounting and finance empower me with adequate knowledge to think and conduct analysis independently in the related area. My research work includes two working papers focusing on financial markets and corporate finance, and one report discussing the proper government deficit rate for current China. Besides, after understanding the culture of most part of China and Asia, time spent with heterogeneous people enables me to appreciate various customs and traditions, which not only helps me to accommodate to a new environment swiftly, but also inspire my creativity and work efficiency.

It would be an honor to work in such a world leading consulting company as an intern. I am looking forward to utilize my skills, specifically, fluent English (IELTS band 7.5), professional knowledge in finance and accounting, work experience in bank and trust companies, excellent proficiency in SAS, Stata, and Office software etc., to learn from and benefit your organization.

Thank you for your consideration, and I look forward to hearing from you soon.

Yours sincerely,

Dong Liye
